

CAMP JOY  
**SAVES \$5,000 PER YEAR**  
 BY CONVERTING TO LED

## FOCUSED LEARNING WITH BRIGHTER LIGHTING AND REDUCED MAINTENANCE

The predecessor agency of Wesley Education Center for Children and Families was opened in January 1920 by the Woman's Home Missionary Society of the Methodist Church in response to needs voiced by young working mothers. Today, Wesley Education Center for Children and Families, led by Director Carla Butler, a Masters Degree prepared Wesley graduate, continues to provide vital, quality programs for a daily enrollment of about 50-60 infants, toddlers, and preschoolers. This full-building lighting retrofit included classrooms, offices, kitchen and the bathrooms which also received motion sensor controls to further increase energy savings.

**"It was such a pleasure working with Donovan Energy. Ron and his crew made the process so easy. They worked around our hours of operations so the children and the day to day business wouldn't be affected. I would not hesitate working with them again."**

- Jenn, Executive Director

## ANNUAL IMPACT THE ENERGY SAVINGS MATTER

**\$3,400**  
 ENERGY

**46,997**  
 KWh

**\$1,800**  
 MAINTENANCE

LED lighting is often the easiest energy conservation measure to complete in commercial buildings. Through our partnerships with leading LED lighting manufacturers and distributors, you can feel confident in an actionable plan that will cut your energy costs. Call us to set up a free assessment.
